DETAILED ACTION

1. This is the initial office action for KAMIYA application no. 10/573,790 filed March 28, 2006.

2. Claims 1-10 are currently pending and have been considered.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1, 2, and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. Claims 1, 2, and 6 cite the step of "using" the salt. It is unclear what steps are performed while using the salt.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Application/Control Number: 10/573,790 Page 3

Art Unit: 1791

1. Determining the scope and contents of the prior art.

- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 8. Claims 1-10 rejected under 35 U.S.C. 103(a) as being unpatentable over FORKER JR et al. (US 3,773,489).

FORKER teaches a chemical strengthening treatment wherein a glass disk is brought into contact with molten salt (col. 1, lines 12-16) as in instant claims 1 and 4. FORKER teaches that the salt may be $K_2Cr_2O_7$ or KCl- $K_2Cr_2O_7$ mixture (col. 4, lines 19-21). FORKER states that the salt is in a molten state, which implies that the salt was initially solid and melted down. It would have been obvious to use a granular form of $K_2Cr_2O_7$ so that the salt would melt faster.

Granular $K_2Cr_2O_7$ may be formed by a limited number of ways including compacting or shaping powders as in instant claims 2 and 6. Regardless of the means to produce the granular form, the granular $K_2Cr_2O_7$ is melted and the molten salt would not be affected by the means to granulating the salt.

FORKER discloses that the glass may be aluminosilicate glass (col. 4, lines 1-4) as in instant claims 3, 7and 9.

FORKER discloses that a magnetic film may be applied to the glass substrate after strengthening (col. 3, lines 64-68) as in instant claims 5, 8, and 10.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CYNTHIA SZEWCZYK whose telephone number is (571)270-5130. The examiner can normally be reached on Monday through Thursday 7:30 am to 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on (571) 272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
